

Endeavor PowerPoint Bullets for 6/28/2010
Operational Period: 6/27/2010 Sampling Period

- Water samples were collected at Station EN16 at the western plume site. Samples were collected every 30 m between the depths of 900 m and 1200 m.
- AUV Sentry mission in under way farther southwest of the wellhead. The Sentry continues to provide results, but data must be processed and validated.
- CTD data for today's station is not included since the sensor failed and was replaced. They are awaiting a software update to upload and process data from Station EN16.
